# PROBLEM STATEMENT

People often forget daily tasks or struggle to manage them effectively. A simple digital tool is needed to organize tasks and mark them as complete.

# PROJECT OVERVIEW

This is a web-based To-Do List application built using HTML, CSS, and JavaScript. It allows users to add, complete, and delete tasks with a clean, user-friendly interface.

# WHO ARE THE END USERS?

Students (to track assignments,  
homework) Working professionals  
(to track daily tasks,  
meetings) General users (for  
shopping lists, personal tasks)

# TOOLS AND TECHNIQUES

■

Students (to track assignments, homework) Working professionals (to track daily tasks, meetings) General users (for shopping lists, personal tasks)

■

■

# POTFOLIO DESIGN AND LAYOUT

Students (to track assignments,  
homework) Working professionals (to  
track daily tasks, meetings) General  
users (for shopping lists, personal  
tasks)

# FEATURES AND FUNCTIONALITY

Add new tasks ✓ Mark tasks as completed (strikethrough style) ✓  
Delete tasks ✓ Responsive design (works on desktop and mobile) ✓  
Local storage support (optional upgrade)

# RESULTS AND SCREENSHOTS

Show screenshots of:  
Empty To-Do list  
Adding a task  
Marking a task as done  
Deleting a task

# CONCLUSION

The To-Do List app demonstrates how HTML, CSS, and JavaScript can be combined to build an interactive, user-friendly application. It is lightweight, responsive, and can be extended with more features
